

THE WILSON ADVANTAGE

TRUMPF® STYLE PRESS BRAKE TOOLING

High Precision Tooling For Trumpf Press Brakes

When it comes to press brake tooling, there's only one style that fabricators really need—Wilson Style press brake tooling. Wilson Tool International® puts its unique signature of unmatched quality and unbeatable performance on every style of press brake tooling we manufacture, including our new Trumpf® style press brake tooling. Completing our comprehensive package of high performance press brake tooling, the addition of Trumpf style tooling lets fabricators enjoy all of the benefits of Wilson's innovation and engineering, no matter what style of tool they use. Rely on Wilson Tool's Trumpf style press brake tooling for:

- ▼ Precision ground tooling to a tolerance of +/- .0008" (.02mm) on all critical dimensions
- ▼ Nitrex™ High Endurance Surface Enhancement, exclusively from Wilson Tool, engineered with a surface hardness of HRC-60 to extend tooling life by several times that of standard tooling
- ▼ The unparalleled design and manufacturing expertise to fulfill special and custom tooling orders fast
- ▼ The shortest lead-times and fastest deliveries in the industry
- ▼ The most complete package of high performance press brake tooling with Trumpf Style, European Style and Wilson American Precision™, the industry's original American Precision tooling

Extend The Life Of Your Tools With Nitrex™

Nitrex™ high endurance surface enhancement, exclusively from Wilson Tool, increases press brake tooling life by several times that of standard tooling. With a surface hardness of HRC-60, Nitrex adds lubricity to press brake tooling and lowers the coefficient of friction as the steel slides over the shoulder of the V-opening on a die. Any Wilson Tool press brake punch or die can be enhanced with Nitrex and all of Wilson Tool's large 1V press brake dies now come standard with Nitrex.

Nitrex™ High Endurance Surface Enhancement U.S. Patent Number: 6,327,884 B1
